There are well over 220 Doosan service and sales locations operating in Canada and the United States. Furthermore, there are more than 90 independent sellers moving forklift materials and materials handling equipment. This system enables Doosan Infracore America to aggressively compete in this competitive market. The forklift product line remarkably includes 63 distinctive versions consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion forklifts. Capacities of these numerous vehicle versions range from 3,000 to 33,000 lbs. All trucks are designed in an ISO 9001 certified facility.

Doosan Infracore America is the fastest developing forklift and lift truck corporation in the North American marketplace, thanks to its excellent level of product performance and their persistently high level of client support and service given to all Doosan Infracore Forklift users. The U.S. lift Truck division stationed in Cleveland has a expert team knowledgeable in Sales, Purchasing, Marketing, Logistical and Technical Support.

Originally the domestic forklift market in Korea was an open import enterprise. Korea Machinery Co. Ltd. began in 1960, to import fully assembled forklifts as part of a home-based machinery expansion project. Product sales of these products were initially targeted to state-run corporations, large scale organizations, and the armed forces. This ultimately led to a unification with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division begun business operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a forklift manufacturing plant was successfully completed. Continuous technical training became the new focus for enhancing quality and product development.

Daewoo started the first domestic lift truck business in 1967, and quickly gained a whopping 90% share in the Korean Materials Handling market. By the 1980's, Daewoo's advanced technological improvements combined with sales success placed them in a position of considerable growth of their forklift business.

In 1981, Caterpillar Industrial Inc. of the United States, proposed a joint enterprise project to counter act competitive pressures in the US materials handling market. This venture radically expanded Daewoo's forklift sales. Construction was completed in 1984 to facilitate a modern plant which helped set up the company for the manufacture of high added-value goods suitable for export. In 1993, the company had a global sales system and started exporting versions they had developed through in-house technology, as an sovereign brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing expansion opportunities into overseas markets.
