

Toyota Forklift Part

Toyota Forklift Parts - Since 1992, Toyota Material Handling inc., U.S.A., also known as TMHU, has been the top selling lift truck provider in the U.S. Proudly celebrating more than 40 years of service, the Irvine, California based business presents an extensive line of quality lift vehicles. Owing to their reputation of superiority, reliability, and resilience, Toyota remains prevalent in this aggressive market. Quality is the foundation of Toyota's renowned Toyota Production System practiced at all manufacturing facilities, including TIEM, which is stands for Toyota Industrial Equipment Manufacturing, located in Columbus, Indiana. The majority of the Toyota lift trucks sold in the U.S. are built here.

All Toyota machines and components manufactured within North America adhere to the International Organization for Standardization or ISO 14001 standard. TIEM has been honored many times for its dedication to persistent progress, and its environmental systems. It is the first and only manufacturer to offer EPA and CARB-certified Compressed Natural Gas powered lift trucks on the market. To illustrate, the Toyota 8-Series IC lift vehicles emit 70 percent less smog forming emissions than the current centralized EPA standards and have complied with California's strict emission standards and policies.

TMHU, U.S.A.- Leading the Industry

The head of Toyota Material Handling, U.S.A., Brett Wood believes that TMHU's achievement comes from its dedication to manufacture high quality lift vehicles at the same time as offering outstanding customer assistance and service. "We must be able to learn and predict the needs of our customers," said Brett Wood. "As a leader, our success also depends on our ability to address our customers' operational, safety and environmental cost issues."• TMHU's parent company, Toyota Industries Corporation, also referred to as TICO, is listed in Fortune Magazine as the world's largest lift truck dealer and is among the magazines prestigious World's Most Admired Companies.

New Meaning to Environmental Accountability

Toyota's parent company, Toyota Industries Corporation, has imparted an exceptional company ideology towards environmental conservancy within Toyota. Toyota's rich history of environmental protection whilst retaining economic viability can not be matched by other organizations and undoubtedly no other materials handling producer can so far rival Toyota. Environmental accountability is an important feature of company decision making at Toyota and they are proud to be the first and only manufacturer to provide UL-listed, EPA- and CARB-certified Compressed Natural Gas powered lift vehicles. Yet one more reason they remain a leader within the industry.

Toyota first launched the 8-Series line of lift trucks in 2006, yet again exhibiting its leadership and innovation in the industry. Featuring an exclusive emission system that eclipsed both Federal EPA emission values, and California's more environmentally friendly emission standards. The finished product is a lift vehicle that creates 70 percent less smog forming emissions than the current Federal standards tolerate.

Also starting in 2006, jointly with the Arbor Day Foundation, Toyota added to its commitment to the natural environment. To this day more than 58,000 trees have been embedded in the ground throughout national forests and local parks that were damaged by fires and other environmental causes. 10,500 seedlings have also been scattered through Toyota Industrial Equipment's network of dealers to non-profit organizations and local consumers to help sustain communities all over the United States

Toyota's lift vehicles offer superior strength, visibility, productivity, ergonomics, and all the foremost safety technology that has made Toyota an industry leader. The company's System of Active Stability, also referred to as "SAS"•, helps limit the chance of incidents and accidental injuries, and increasing productivity levels while minimizing the likelihood of merchandise and equipment damage.

System Active Stability senses numerous elements that might lead to lateral volatility and possible lateral overturn. When any of those factors are detected, SAS immediately engages the Swing Lock Cylinder to steady the rear axle. This alters the lift truck's stability footprint from triangular in shape to rectangular, providing a major increase in stability which substantially reduces the probability of a mishap from a lateral overturn. The Active Mast Function Controller or the Active Control Rear Stabilizer also assists to avoid injuries or accidents while adding stability.

SAS was originally introduced to the market on the 7-Series internal combustion products in 1999 and subsequently catapulted Toyota into the industry leader for safety. Since then, SAS have been integrated into nearly all of Toyota's internal combustion models. It is standard gear on the new 8-Series. There are more than 100,000 SAS-equipped lift vehicles in action, exceeding 450 million hours combined. The increased population of SAS-equipped vehicles in the field, along with compulsory operator education, overturn fatalities across all brands have decreased by 13.6% since 1999. Furthermore, there have been an overall 35.5% reduction in industry wide collisions, loss of control, falls and overturn from a lift truck for the same period.

Toyota's pattern of brilliance reaches far beyond its technological achievements. The company maintains an extensive Operator Safety Training curriculum to help clients meet OSHA standard 1910.178. Instruction packages, video tutorials and an assortment of resources, covering a wide scope of topics-from individual safety, to OSHA regulations, to surface and cargo situations, are offered through the vendor network.

Since the sale of its first lift truck in the U.S. to the fabrication of its 350,000th lift vehicle produced in 2009 at Toyota Industrial Equipment Manufacturing, TMHU has continued a unbroken presence in the U.S. This reality is demonstrated by the statistic that 99% of Toyota lift trucks sold in America now are built in the United States.

Situated in Columbus, Ind., the Toyota Industrial Equipment Mfg. campus equals 998,000 square feet of facilities spanning 126 acres. Facilities include a National Customer Center, as well as production operations and supply centers for equipment and service parts, with the whole commitment exceeding \$113 million dollars.

The new NCC was built to serve TMHU clients and sellers. The facility includes a 360-degree showroom, a presentation theater complete with stadium seating for 32, an section for live product demonstrations with seating capability for 120; a presentation theater; Toyota's Hall of Fame showcasing Toyota's history since the birth of its founder, Sakichi Toyoda, in 1867, and finally a instruction center.

The NCC embodies Toyota's dedication to providing top-notch client service. TMHU's 68 authorized Toyota Industrial Equipment, or TIE dealers, along with 189 dealership locations throughout the U.S, provide the most wide-ranging and inclusive client service and support in the industry. The company's new and Licensed Used lift vehicles, service, components, and financing features make Toyota dealerships a one-stop shop to guarantee overall consumer satisfaction.
